Caypombo, Sta. Maria, Bulacan | +639151855519 | [linkedin.com/in/mj-tuplano-295a6b297](https://www.linkedin.com/in/mj-tuplano-295a6b297) | github.com/MjTuplano18

EDUCATION

Polytechnic University of the Philippines *Expected October 2026*
Bachelor of Science in Information Technology — Santa Maria, Bulacan
Cumulative GPA: 1.47 | President's Lister (1st & 2nd Year) | Dean's Lister (3rd Year)
Relevant Coursework: Software Engineering, Web Development, Networking, Database Management, Cloud Computing Fundamentals

SKILLS

Programming Languages: Python, C, C#
Backend Frameworks: FastAPI, Django, Pandas
Data & Analytics: Pandas, Apache Airflow, dbt, Snowflake, Power BI, SQL (MySQL, PostgreSQL), Supabase
Frontend & UI: React, Vite, Streamlit, Three.js
Cloud & Platforms: AWS, Salesforce, Git, Docker (Basic), Figma, Canva
AI & Productivity Tools: ChatGPT, Claude AI, DeepSeek, Gemini, Blackbox

WORK EXPERIENCE

S.P. MADRID AND ASSOCIATES — Data Analyst / Developer Intern *March – June 2026*
Paranaque City | Loan Collections Company

- Automated repetitive report generation workflows using Python, Pandas, and openpyxl, producing clean, properly structured Excel files with formatted headers for internal use
- Built internal dashboards using Next.js and Streamlit to monitor collections performance and loan portfolio metrics
- Developed a payment claim and bank query automation tool using Streamlit and pyodbc, connected to a live MySQL database via ODBC
- Cleaned and transformed raw collections data into structured Excel reports, standardizing column headers and data formats for downstream analysis

7PRIMETECH INC. — Data Analyst (BPO) *September 2023 – February 2024*
Taguig City

- Handled customer payments including tracking deposits and withdrawals using banks in Indonesia and e-wallet platforms
- Maintained and updated payment records in Excel for accuracy and reporting purposes
- Provided customer support via chat, resolving inquiries and assisting with payment issues

IPP TECHNOLOGIES INC. — Data Specialist (BPO) *July 2021 – March 2022*
Quezon City

- Conducted outbound calls to companies to promote products and generate sales leads
- Assisted clients by providing accurate information and addressing inquiries to support sales processes
- Maintained detailed records of client interactions and sales activity in company databases

PROJECTS

Philippine Credit Risk & Collections Analytics Pipeline *May 2026*
github.com/MjTuplano18/-ph-credit-pipeline-snowflake-powerbi

- Built an end-to-end ELT pipeline using Snowflake (RAW → STAGING → MART), dbt, and Apache Airflow to analyze Philippine credit risk and loan collections data
- Integrated Lending Club Kaggle dataset with BSP macroeconomic API feeds to surface high-risk loan segments under real macroeconomic conditions
- Delivered interactive Power BI dashboards for collections performance monitoring, risk scoring, and segment prioritization
- Stack: Python, Pandas, Snowflake, dbt, Apache Airflow, Power BI, SQL

PayAnalytics — Payment Data Analytics Dashboard

github.com/MjTuplano18/PayAnalytics

May 2026

- Developed a payment analytics platform to track and visualize transaction data, providing insights into payment trends and anomalies
- Implemented data processing pipelines using Python and Pandas to clean, aggregate, and summarize payment records for financial reporting
- Stack: Python, Pandas, SQL, NextJs,Typescript

TalaStock — ETL Data Platform

github.com/MjTuplano18/talastock-etl-data-platform

April 2026

- Designed and implemented an ETL data platform for stock and inventory data management with automated ingestion and transformation pipelines
- Normalized and loaded structured data into a central data store to support downstream analytics and reporting
- Stack: Python, Pandas, SQL, ETL pipeline architecture

Payment Claim & Bank Query Automation

github.com/MjTuplano18/payment_claim_bank_query_automation_streamlit

March 2026

- Built a Streamlit web app to automate payment claim processing and bank query workflows, eliminating repetitive manual data encoding
- Connected to a live MySQL/Volare CMS via pyodbc for automated data extraction; used pandas and openpyxl for transformation and Excel report generation
- Stack: Python, Streamlit, Pandas, pyodbc, openpyxl, MySQL

Fullstack E-Commerce Platform (Capstone Project)

January 2026

- Designed and developed a full-stack e-commerce solution with customer storefront and admin dashboard using React, Vite, and Supabase
- Built admin features including sales analytics, order management, product catalog, and real-time inventory tracking
- Integrated 3D product visualization using Three.js and Sketchfab API for interactive PC system building
- Stack: React, Vite, Supabase, Three.js, JavaScript

CERTIFICATIONS & TRAINING

- AWS Educate: Getting Started with Compute, Getting Started with Storage, Introduction to Cloud 101
- Datacamp: Data Engineer Associates
- Cisco: Introduction to Cybersecurity, Introduction to Packet Tracer, Python Essential 1
- Salesforce Trailhead: Administrator, Developer, Visualforce, Lightning Web Components (LWC), Agentic AI Essentials

ADDITIONAL

Languages: English — Professional Working Proficiency

Awards & Honors: President's Lister (1st & 2nd Year), Dean's Lister (3rd Year)
